

FTP Server

User Guide

The SAV-RX FTP server uses File Transfer Protocol (FTP) and Secure FTP (SFTP) for transferring files.

## **FTP** Clients

To connect to an FTP site you need an FTP client. If you are familiar with the windows command prompt you can simply use the ftp program built in, otherwise here is a walk through for FileZilla.

## Downloading FileZilla

Go to <u>https://filezilla-project.org/</u> and Download the FileZilla client like this:

Then click the "Download FileZilla Client" button.

You can find the filezilla installation guide at: <u>https://wiki.filezilla-project.org/Client\_Installation</u>

And a tutorial here: <u>https://wiki.filezilla-</u> project.org/FileZilla Client Tutorial (en)

## Installing FileZilla

Once you download the file, run it and follow the installation wizard to completion.

FTP Server

User Guide

The next two windows have offers. So choose whether you want them or not before clicking next.

Since step 9 started FileZilla "now", you simply wait for it to open. Otherwise run FileZilla now.

## How to Connect

Enter the Hostname, username, password and port given to you.

Finally click Quickconnect and you are connected and ready to upload files.

For an in-depth look at the FileZilla client please refer to their wiki page.
